    (b) What is JavaScript?

    (c) What is the difference between them?

3. Fill in the following table with the corresponding decimal or hexcode representation of the number. For partial credit, show your work.

Decimal	Hexcode
14	
	#14
33	
	#bb
	#ff

4. What does the following JavaScript code do? Write the **ending** value for each variable in the box below. (Show your work for partial credit.)

```
var meenie = 5, miney, moe, all = "it's ";

moe = meenie +2;
miney = meenie % moe;
all = all+moe+"!";
moe--;
```

meenie	miney	moe	all

5. Write Javascript **functions** that will do the following:

   (a) Say ''hi mom!''

   (b) Take as input a number, `digit`, and return true if `digit` is less than or equal 9, otherwise return false.

   (c) Prompt the user for their grades on the last 10 assignments and tell them the average of their grades.

6. Be the browser with the following HTML and CSS files. On the following page of the exam, draw the page and indicate any style (color, borders, etc) on your page:

    <h1>Welcome to the Head First Lounge</h1>
    <p>
      The Head First Lounge is, no doubt, the biggest trendsetter in Webville.
    </p>
    <p>
      During your stay at the lounge, you'll enjoy a smooth mixture of
      ambient and mystic sounds.

    <p>
      But that's not all; at night, join us in the backroom as our resident
      DJ spins a choice selection of trance and drum&amp;bass beats across
      our spacious tiki-themed dance floor.
    </p>
    <p>
      Now that you've experienced the lounge <em>virtually</em>, isn't
      it time to check us out <em>for real</em>? We're located right
      in the heart of Webville, and we've created some

9. Create a form for ordering ice cream from the "228 Ice Cream Shop." Your form should have the following choices (the name used by the web application is included in parenthesis):

- first and last names (`firstname` and `lastname`)
- type of ice cream cone (`cone`)
- kind of ice cream (`iceCream`),
- extra toppings (`extras[]`), and
- a text area for comments and special instructions (`comments`)

For the first four, you should allow only one answer (i.e. radio buttons or pull-down menu), while for extras (i.e. sprinkles, whipped cream, etc), multiple answers are expected (i.e. checkboxes).

The web application for processing the form is located at:
`http://comet.lehman.cuny.edu/stjohn/teaching/cis228/order.php`

10. Write a COMPLETE file that does the following:

- Uses cookies to keep track of when the user has visited in the last year.

- If this is the first visit, the user is prompted for their name and the program replies that it is nice to meet them, using their name (i.e. if they say their name is "Herbert", the program then says, "Nice to meet you, Herbert"). Store their name in a cookie.

- If this isn't their first visit, then welcome them back to the page. For example, if the name stored in the cookie is "Lehman", you would say "Welcome back, Lehman!".

- You can assume that the following functions have been written for you: `setCookie(name, value, days)`, `getCookie(name)`, and `delCookie(name)`.
